

Contents

Preface	v
1. Micro and Meso Scale Compact Heat Exchangers in Electronics Thermal Management – A Review	1
<i>Y. Joshi and X. Wei</i>	
2. High Temperature Heat Exchangers	33
<i>B. Sundén</i>	
3. Design Considerations for Compact Ceramic Offset Strip-Fin High Temperature Heat Exchangers	59
<i>S. Subramanian, V. Ponyavin, C.R. DeLosier, Y. Chen and A.E. Hechanova</i>	
4. Compact Heat Exchangers for Microturbines	75
<i>R.K. Shah</i>	
5. R134a Flow Boiling Heat Transfer In Small Diameter Tubes	95
<i>X. Huo, Y.S. Tian and T.G. Karayiannis</i>	
6. Entrance and Wall Conduction Effects in Parallel Flow Heat Exchangers	113
<i>A. Fakheri and H. Al-Bakhit</i>	
7. Effects of Flow Channel Variations due to Manufacturing and Fouling on Heat Exchanger Performance	127
<i>W. Shang and R.W. Besant</i>	
8. Aspects of Two-Phase Flow Distribution at Header-Channels Assembly	145
<i>S.Y. Lee and J.K. Lee</i>	
9. Power Spectrums and Strouhal Number Distributions for Turbulent Fully-Developed Flows in Rectangular Ducts with Spatially-Periodic Plate Inserts	169
<i>A. Lamoureux, L. Camargo and B. Rabi Baliga</i>	
Author Biographies	187
